11:30PM	5.80 Index Eliminations #6	12:30AM	5.80 Index Eliminations #7

#### Here is information you need to know:

1. Cars must alternate lanes during qualifying. Driver's responsibility. Failure to do so will result in DQ of the fastest pass of the two sessions.
2. Minimum 45 minutes minimum between rounds for each class. Time starts when last pair takes the green.
3. When first pair for each class pulls into water box, a cone will be dropped behind last pair in line. Any car not in front of the cone is disqualified for that round. This includes all rounds. It is each driver's responsibility to ensure they are in line when called. This will be strictly enforced. We appreciate your support to keep the event on schedule for everyone's benefit.
4. Test & Tune ONLY if Time Permits as determined by Dean. Not guaranteed.
5. Track announcements are also broadcast on radio station 107.3 FM.

Schedule Subject to Change
